

## NETWORKING SERVICES

### SHARE INFORMATION AND PERFORM BUSINESS FUNCTIONS WITHOUT INTERRUPTION

When your business relies on information technology, you want an experienced and trusted resource to ensure your network is properly designed and maintained. With over a decade of successful network deployments, Illumen provides a full suite of networking services tailored to meet your business requirements.

#### ILLUMEN'S NETWORKING SERVICES

##### Local and Wide Area networks (LAN/WAN)

Deploy a network designed to meet your traffic, security and budget requirements. Our full breadth of services includes consulting, training, installation, configuration and support.

##### Server Configuration and Installation

Illumen deploys and supports servers running Microsoft operating systems and software. Our expertise includes file and print servers, mail servers, fax servers, database servers, Microsoft Terminal Server, Citrix servers and more.

##### Disaster Recovery Solutions

The only element of your network that cannot be replaced is your data. If your data cannot be restored, it could cripple your business. Provide a scalable data backup solution that ensures your data is available whatever the disaster.

##### Wireless Network Design and Deployment

More businesses today seek to integrate wireless networking for mobile network access. Illumen's wireless solutions are designed to meet your company's needs for proper security, coverage, and ease of management.

##### Secure Remote Access

Staff members may not be in the office, but still need access to all of their IT resources. Provide remote network access that is quick, secure, and easy to use.

##### Power Management

Power spikes and brown-outs can lead to lost or corrupt data and damage to your network components. Ensure the appropriate power management is in place to avoid any type of damage caused by a power anomaly.

##### On-call Network Support

Our network engineers provide network support on-site, over the phone, or remotely over the Internet. With our Servoyant® Active Monitoring, we can monitor your key network elements 24/7 to detect problems and address them before they seriously impact your business.

#### A RECORD OF SUCCESS

Illumen has deployed and maintained computer networks for over a decade.

Our experienced and dedicated staff is highly trained, maintains industry certifications, and has over 40,000 hours of documented field experience working with network technologies including:

- Microsoft
- Cisco
- Juniper
- Foundry Networks
- Citrix
- Avaya
- Trend Micro
- Hewlett Packard

A track record of successful network deployments combined with a genuine concern for our customers' success, has helped Illumen earn client loyalty.
