

ROADWARRIOR

SECURE REMOTE ACCESS MANAGED FOR YOUR SMALL BUSINESS

Provide remote access to your network resources without the high cost of hardware, software, and management. RoadWarrior provides managed remote access over the Internet that is secured with SSL-VPN technology. Use RoadWarrior to enable access as needed for employees, vendors, and clients.

The workspace has changed

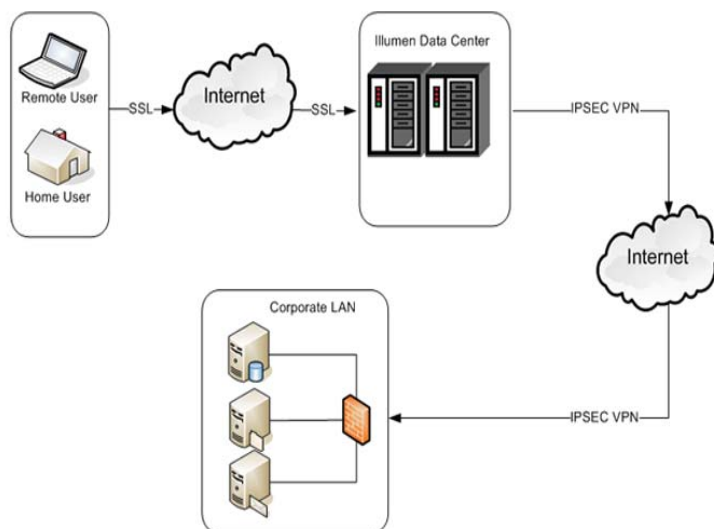

The Internet has removed the confines of your office to a single location. You now have the freedom to work on the road, from home, at a client's site, or even from the airport. Your work space can more easily adapt to the demands of your business.

The RoadWarrior solution

RoadWarrior is a reliable more affordable alternative to existing remote access solutions, that delivers the remote access benefits you seek. Improve your remote access solutions with:

- More reliable access than traditional VPN
- Increased security to protect the network and corporate data
- Multiple access methods for a variety of resources
- Customized access for different types of end users
- Eliminates hardware software and management costs
- Lower Total Cost of Ownership

Secure and Managed Architecture

NETWORKS AS MOBILE AS YOU ARE

Are your business operations constrained by your network? You need a network that is as mobile and accessible as your business demands.

RoadWarrior allows you to affordably and securely extend network resources to:

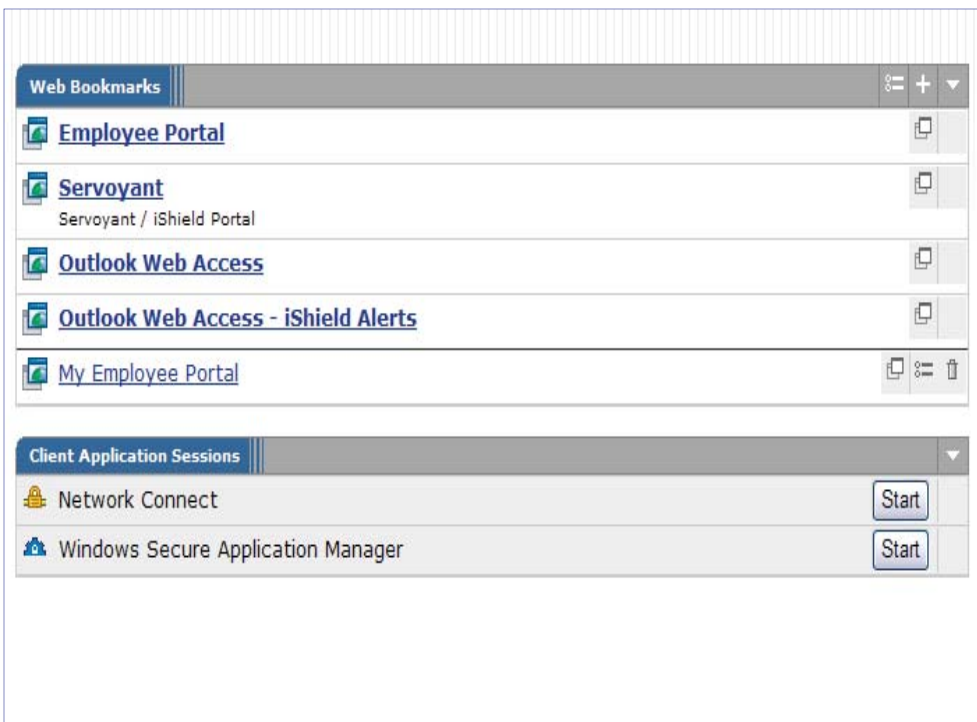

- Home office workers
- Travelling employees
- Branch offices
- Vendors
- Clients

Enable remote network access as needed while maintaining the highest security standards and without adding additional burden to your IT operations.

THE NEXT GENERATION OF REMOTE ACCESS

Traditional approaches to remote access have been plagued by poor access speeds, deployment burdens, poor connection reliability, compromised security and high cost. RoadWarrior resolves these issues with the following features:

ROADWARRIOR FEATURE	BENEFIT
SSL Technology	<ul style="list-style-type: none"> • Secure LAN, intranet and extranet access for employees, business partners and customers • No software to deploy as SSL client is built into every web browser • Remote Access is possible from any computer with Internet connection • More reliable access, due to reduced port blocking and NAT traversal issues • Higher speed connectivity with multiple access methods
Best-in-class Security	<ul style="list-style-type: none"> • Access to network requires authentication • Three access methods allow administrators to provision access by purpose • Dynamic access privilege management • Host checking for security requirements • Cache cleaning to remove all traces of access session
Simple End-user Experience	<ul style="list-style-type: none"> • Single sign-on with Active Directory integration • Intuitive web-based navigation • No software to install and configure
Fully Managed Solution	<ul style="list-style-type: none"> • Does not require the management or deployment of additional hardware or software • Administered by experienced team of certified network and security engineers • No added burden to existing IT operations
Lower Total Cost of Ownership	<ul style="list-style-type: none"> • With no hardware or software to purchase or install, RoadWarrior saves both time and money • Concurrent user subscriptions reduce total access costs • Integrates into existing LAN and WAN infrastructure • Eliminates administrative burden of deploying and managing IPSEC remote access clients

SECURE ACCESS PORTAL

The RoadWarrior Secure Access Portal is accessible from any PC with a connection to the Internet.

Access is granted based on end-user authentication and host checking standards.

Resources are displayed in an attractive GUI format with access to resources available at the click of a button.
